DETAILED ACTION

Status of the Claims

Claims 1-30 are currently pending.

Claims 4-8 and 11-15 are withdrawn from consideration as being directed to a nonelected invention.

Claims 1-3, 9, 10 and 16-30 are under consideration to the extent they read on the elected invention.

1. Applicant's election without traverse of Group I (claims 1-3, 9, 10 and 16-30 in part) in Paper No. 9 (dated 7/24/03) is acknowledged.
2. Applicant's election of monosuccinic acid ester of probucol as the antioxidant species and carboplatin as the neoplastic species which reads on claim 1-3, 9-10, 18-19 and 23-30 in Paper No. 9 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a))
3. Upon further consideration, the following supplemental election of species is hereby required.

Election/Restriction of Species

This application contains claimed methods directed to the treatment of "a disorder of abnormal cell proliferation or solid growth" directed to the following patentably distinct disorder species of the claimed invention (e.g. claims 27-30) including "papilloma ... melanoma ...

Art Unit: 1639

cardiovascular condition , restenosis” which represent patentably distinct disease states and disorders due to differences in etiologies, symptoms, treatments and which methods relating thereto require different and separately burdensome manual/computer bibliographic searches in patent and non-patent literature databases.

Applicant is required under 35 U.S.C. 121 to elect **a single disclosed species (e.g. a specific disorder)** for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 1639

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
